Artificial Intelligence and Machine Learning | Aspiring Software Developer & AI Consultant

LinkedIn | GitHub | LeetCode | HackerRank

PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning, with an 8.4/10 CGPA and hands-on experience in AI/ML and web development. Demonstrates leadership through an AI-powered environmental monitoring project and a farmer-focused entrepreneurship initiative. Brings technical internship experience, collaborative problem-solving skills, and hackathon participation, with a focus on developing practical technology solutions. Aspires to build scalable, impactful applications at the intersection of software engineering, artificial intelligence, and business innovation.

TECHNICAL SKILLS

Programming: Python, Java, C

Web Development: HTML, CSS, JavaScript, React, TypeScript

Databases & Backend Services: MySQL, MongoDB, Supabase

AI/ML: Machine Learning Fundamentals, XGBoost, Explainable AI

Tools: Git, GitHub, Visual Studio Code

PROJECTS

AirShield — AI-Powered Air Pollution Monitoring Platform

Team Leader | Completed | Google Cloud: Build with AI — Code for Communities, Second Edition (Hack2skill), Sep 2026

- Led the team in developing an environmental monitoring prototype featuring PM2.5 prediction, pollution-risk analysis, and data visualization.
- Contributed to the XGBoost prediction workflow, dashboard components, and AI-generated insights to make pollution information easier to interpret.

RicozSpark — Web Application Development

Completed

- Developed frontend components and user-interface elements using React, TypeScript, and CSS.
- Contributed to application routing and authentication flows, and integrated Supabase into a structured web application.

MentorHub — AI-Powered Goal and Career Guidance Platform

Ongoing

- Designing an AI-supported platform concept for learning and career planning, including personalized roadmaps, scheduling, and progress tracking.

INTERNSHIP EXPERIENCE

Cargonest Warehousing Technologies Pvt. Ltd. — Full Stack Intern | Sep 2026 – Present

- Working in full-stack development; confirmed tools and technologies include Java, React, TypeScript, Git, and Visual Studio Code.

Infocs — Full Stack in Java Intern | Jun 2026

- Completed an internship in full-stack development with Java.

Mindenious — Python with Machine Learning Intern | Apr 2026

- Completed an internship focused on Python with Machine Learning.

EDUCATION

B.E./B.Tech. in Computer Science Engineering — Artificial Intelligence and Machine Learning

VSB College of Engineering and Technical Campus, Coimbatore | Expected 2029 | CGPA: 8.4/10

Higher Secondary

ELGI Matric Higher Secondary School | 2025 | 86%

Secondary

ELGI Matric Higher Secondary School | 2023 | 96%

HACKATHONS & ENTREPRENEURSHIP

Smart India Hackathon (SIH): Participated as part of a team exploring a storm-focused disaster-management solution.

Women Who Master Hackathon — Logitech: Participant | Jul 2026.

BeyondBeta — FarmPower Startup Pitch: Team Leader; contributed to a farmer-centric idea exploring technology-enabled agricultural support and accessible farmer engagement.

CERTIFICATIONS

- Prompt Engineering — Amazon Web Services (AWS) | Oct 2026
- Introduction to Generative AI and Agents — Microsoft | Jul 2026
- Gemini Certification for Students — Google for Education | Jul 2026
- Problem Solving (Basic) — HackerRank | 2026
- Python with Machine Learning — Mindenious | Jun 2026
- Advanced Diploma in Python Programming — iNet Technologies | Oct 2025

INTERESTS

- Software Development
- Full-Stack Web Development
- Applied Artificial Intelligence and Machine Learning
- Explainable AI
- Technology for Environmental and Community Impact
- Technology-Enabled Agricultural Support
